How to Measure with a Ring You Already Own

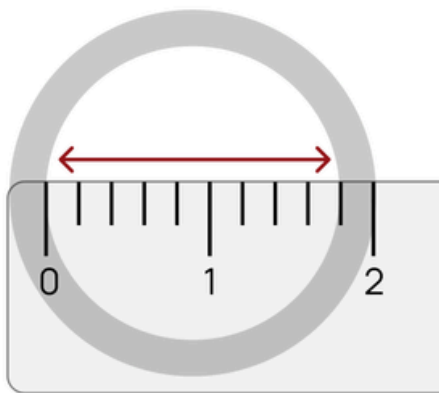

tanishq.co.in

What you'll need:

- The ring (make sure it is not bent or oval-shaped).
- A standard ruler with centimeter (cm) or millimeter (mm) markings.

The Steps:

1. Place the Ring: Lay the ring down on a flat surface.
2. Position the Ruler: Place the ruler directly on top of the ring.
3. Align: Line up the "0" mark of the ruler with the inside edge of the ring on the left side.
4. Measure: Read the measurement at the inside edge of the ring.
5. Count the Measurement: This number is your Inner Diameter. Use this number to find your size on the chart.

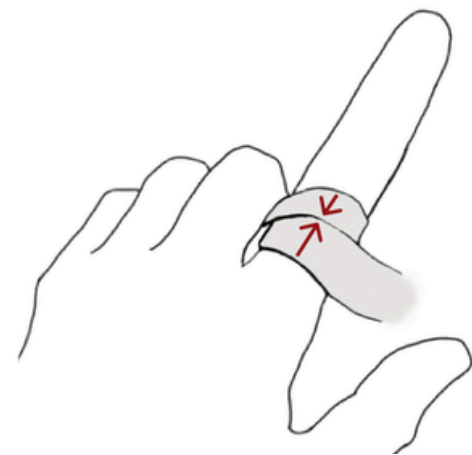

How to Measure Your Finger with Paper or String

What you'll need:

- A thin strip of paper (about 1/2 inch wide) OR a piece of non-stretchy string.
- A pen or marker.
- A standard ruler with centimeter (cm) or millimeter (mm) markings.

The Steps:

1. Wrap It: Wrap the paper or string around the finger you want to wear the ring on. Place it near the base (where the ring will sit).
2. Mark It: Hold the spot where the paper/string overlaps. Use your pen to draw a line across both layers so you have a clear mark on both ends.
3. Measure It: Lay the paper/string flat on a table. Measure the distance between the two marks with your ruler.
4. Find Your Size: This number is your Inner Circumference. Match it to the sizing chart.
